

IGNITE YOUR CAREER!

INTERN ABROAD WITH CAPA

Global Internships

CAPA has been placing students at internship sites abroad for over 20 years! As a CAPA intern, you can take advantage of placements in these Global Cities:

Buenos Aires, Argentina

Dublin, Ireland

Florence, Italy

London, United Kingdom

Sydney, Australia

Shanghai, China

Interning abroad carries many benefits for your academic, personal, and professional growth. Here are five reasons to intern abroad with CAPA:

Earn academic credit while building international work experience. CAPA internships can be taken for 3 or 6 credits and are accompanied by courses in a variety of disciplines.

Gain experience in your field from an international perspective. You will be placed in an internship that matches your goals for your skill development and your future career.

Enhance your resume. Add practical work experience to your resume and learn how to articulate the skills that you can bring to future jobs.

Build a network of international professionals who can serve as references. By learning to work with people from all different backgrounds, you will also gain intercultural communication skills, which are highly valuable in the workforce.

Stand out from the crowd when applying for jobs. Only 10% of students study abroad and even fewer participate in internships. Your experience will help you get your foot in the door and be a talking point in job interviews!
