

High School BEAR Innovation

An early prototype is a rough representation of your idea. Typically, prototypes could be a storyboard, a paper model, sketch, picture, inspiration board or model. This year's prototype should be a digital prototype. It could be a video, a website landing page, a storyboard, a wireframe or any other digital representation of a simple model of your solution.

Your prototype can be used for:

- Creating a shared understanding about your solution
- Developing assumptions and testing them
- Explaining your idea to your users and obtaining their feedback

You will need to have a SIMPLE early prototype for your final presentation on Saturday.
